Marwan Ali Bebars

Giza, Egypt | +201153295999 | marwanpepars@gmail.com| LinkedIn |GIthub| Portfolio

Profile

Computer Science and Artificial Intelligence student with strong interest in AI and Machine Learning. Experienced in building practical projects in deep learning, computer vision, and data analysis using Python. Passionate about solving real-world problems, continuous learning, and developing intelligent systems. Expected to graduate in 2027.

Education

Bachelor of Science in Computer Science and Artificial Intelligence, Cairo University, Cairo, Egypt 2023-2027

Skills

- Data Analysis (Python)
- Data Visualization (Python)
- MySQL & SQLite
- Microsoft Excel
- Machine Learning Basics
- Model Training & Evaluation
- Deep Learning Fundamentals
- Image Processing Basics
- Convolutional Neural Networks (CNN)
- Git& GitHub

Projects

- **Exoplanet Detector — NASA Space Apps Challenge 2025** *(Team Project)*
  - Built an end-to-end AI-powered web application to analyze stellar light curves and detect potential exoplanets
  - Trained and tested Machine Learning and Deep Learning models using real NASA datasets (Kepler, K2, TESS).
  - implemented a Flask backend for model inference using PyTorch, with a lightweight heuristic fallback for reliability.
  - Developed interactive data visualizations for light curves using Plotly.
  - Supported CSV and FITS file uploads with a built-in sample dataset for testing.
  - Collaborated within a multidisciplinary team under hackathon time constraints, focusing on problem-solving and innovation.
- **TheFirstExpress — Study Abroad Application Management System**
  - Designed and developed a web-based platform that streamlines the study abroad application process.
  - Built search functionality for discovering universities by country and academic program.
  - Implemented an application tracking module to manage deadlines, submission stages, and status updates.
  - Created a document management checklist to reduce application errors and missed requirements
  - Applied responsive design principles for accessibility across devices.
  - **Tech:** HTML, CSS, JavaScript
  - **GitHub:** https://github.com/Marwan252/thefirstexpress-sa
- **Library Management Dashboard**
  - Developed a Django-based library management dashboard to track sold and rented books, with role-based access, book CRUD operations, and borrowing/return workflows.
- **Online Library Platform***(Team Project)*
  - Built a full-stack online library platform connecting authors and readers, with book publishing and reading features, secure authentication, and role management (teamwork)
  - **GitHub:** https://github.com/Marwan252/library_project
- **Machine Learning Classification Project**
  - Implemented classification and regression machine learning models in Python using structured data.
  - Performed data cleaning, feature selection, and model evaluation using basic ML techniques.
- **Computer Vision Image Classification**
  - Developed an image classification model using Convolutional Neural Networks (CNN).
  - Applied image preprocessing and augmentation, and experimented with pretrained models (transfer learning) for improved performance
  - **GitHub:** https://github.com/Marwan252/ANN-Projects
- **Clothing Semantic Segmentation — Computer Vision Project**
  - Developed a deep learning model for pixel-level image segmentation.
  - Implemented data preprocessing pipelines for images and corresponding masks.
  - Built and trained a CNN-based segmentation architecture (e.g., U-Net / FCN) for accurate object boundary detection.
  - Evaluated model performance using segmentation metrics such as Intersection over Union (IoU) and accuracy.
  - Visualized predicted masks alongside original images for qualitative analysis.
  - **Tech:** Python, TensorFlow, Keras, NumPy, Matplotlib
  - **Kaggle:** https://www.kaggle.com/code/marwanbebars777/get-started-with-semantic-segmentation

- **Additional Projects**
  - Tech: MySQL, SQLite, Python, C++

Languages

- Arabic
  - Native or Bilingual Proficiency
- English
  - intermediate / Limited Working Proficiency
